

91H0xxx-xxM Rev.A

Email

Check and send email messages right from your phone.

Gmail

If you signed into your Google Account when you first set up your phone, you'll be able to send and receive Gmail messages. From the Home screen, just tap  > Gmail.

Adding your other email accounts

Use the Mail app to add your webmail and other POP3 or IMAP email accounts.

1. From the Home screen, tap  > Mail.
2. On the Choose a mail provider screen, tap **Other** (POP3/IMAP).

If you don't see this screen, press MENU, and then tap **More > New account > Other** (POP3/IMAP).

3. Enter the **Email address** and **Password** for your email account.
4. Follow the onscreen instructions to finish setting up your email account.

If you have a Microsoft Exchange ActiveSync work account, you can also set it up on your phone. To find out how, see the complete user guide.

Sending an email message

1. From the Home screen, tap  > Mail.
2. If you have several email accounts, choose an account you want to use.

3. On the email account Inbox, tap **Compose mail**.
4. Tap . Then choose the email addresses of contacts to send to.
You can also directly enter email addresses in the To field, separating them with a comma.
5. Enter the subject, and then enter your message.
6. Tap **Send**.

Unified inbox for all your email accounts

View email from all your accounts just in one place without having to switch to different accounts.

Just tap the bar that shows the current email account, and then tap **All accounts**.

Capture your big moments

Use your phone's 8 megapixel camera with dual flash to take high resolution photos. The camera even records videos in HD.

It has auto face detection, and lets you add effects to make your photos look like they've been taken through special lenses and filters.

And when you switch and use the front camera, you can easily take your own closeup shots or videos.

What's more, you can tag your friends in photos and share videos in Facebook and Flickr®. Uploading to YouTube is easy too.

Check out the complete user guide for more details.

Catch up with friends in your social networks

Friend Stream connects you to your social networks. Share and get updates from friends in popular networks like Facebook and Twitter in a single feed. With Friend Stream, you can easily track your friends' status messages, photo uploads, notifications, and more — or comment and post your own.

Get HTC Sync

You can use the HTC Sync software to sync contacts, calendar, and other information between your computer and your phone. Copy HTC Sync from the microSD card that came with your phone and install it on your computer.

1. Connect your phone to your computer using the USB cable that came with your phone.
2. When the Connect to PC screen appears, tap **Disk drive** and then tap **Done**.
3. On your computer, access your phone's storage card which is recognized as a removable disk.
4. Copy HTCSync.exe to your computer.
5. Unmount your phone as required by your computer's operating system to safely remove it.
6. On your computer, double-click HTCSync.exe and follow the onscreen instructions to install HTC Sync.

Visit our support website (www.htc.com/support) from time to time to check for the most recent HTC Sync upgrade so you can download and install it.

Locations

Locations is your perfect travel companion, whether you're at home or in a different country. Easily browse maps, search for nearby places of interest, and get directions to places you want to go to.

Maps for free

Your phone already comes with a map installed. What map you'll have depends on the country where you bought your phone.

Before you travel to other countries, you can download more country maps to your phone for free. Then you won't need to use your data connection when browsing maps and searching places, freeing you from costly data roaming fees.

Upgrading services

If you need turn-by-turn GPS navigation and safety camera information, you can purchase them as add-on services.

1. From the Home screen, tap  > Locations.
2. Press MENU, and then tap **Get more**.
3. Slide to the tab of the service, and then tap what you want to purchase.
4. Tap **Purchase**.

To find out more about how to use Locations, see the complete user guide.

Your HTC Incredible S Quick guide

For the complete user guide and other helpful resources, go to www.htc.com/support. Please also read the Safety and regulatory guide that's included in the box.

Before you do anything else, please read this

Charge the battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Choose a rate plan wisely

Your phone can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates.

Know about privacy laws

Some countries have strict laws about how and when you can record phone conversations. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

And finally, a few important words from our legal team (LIMITATION OF DAMAGES)

To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

Get to know your phone

You'll see the HOME, MENU, BACK, and SEARCH buttons later when you switch your phone on. These buttons also rotate when you turn your phone sideways to the left while you're in an app that supports auto screen rotation.

Before you turn on your phone

Get everything in order before you press the POWER button.

Removing the thin film from the battery

1. Hold your phone securely with the front facing down.
2. Starting from the small opening at the bottom of the phone, lift the back cover and remove it completely.

3. Peel off the thin film of the battery that's inside your phone. Pull the flap of the film to release the battery.

Inserting your SIM card and storage card

1. Insert the SIM card (with its gold contacts facing down and cut-off corner facing out) all the way into the SIM card slot.

2. There's already a microSD card in your phone, which is in the left panel. (Push the microSD card in to eject and remove it. To reinsert, push it in until it clicks into place).

Inserting the battery

1. Insert the battery (with its exposed copper contacts first) into the battery compartment.

2. Align the back cover onto the phone's top panel.
3. Press all sides of the back cover towards the phone.

You'll hear clicks when the small tabs underneath the back cover are locked in place.

Charging the battery

Use the supplied power adapter and USB cable to charge your phone.

Set up your phone

When you switch on your phone for the first time, just follow the onscreen instructions to set up your phone.

Be sure to sign in to your Google Account so you can use Google apps like Gmail™.

You can also set up your other email accounts, favorite social networks like Facebook® and Twitter™, and more. You can even easily transfer contacts and other information from popular brand phones to your new HTC phone through Bluetooth.

Make your Home screen

Make your Home screen look just the way you want it. Choose from scenes which are personalized layouts. Or create one for your own and pick a different skin and wallpaper.

Aside from the main Home screen, you have up to six extra Home panels to add all the things you need. Add widgets, apps, shortcuts, and folders for one-touch access.

That's not all. You can even shuffle the Home panels in the order that you want. Simply pinch your fingers on the main Home screen to show the Leap view. Then press and drag a Home panel.

Keep in contact

There are several ways you can add contacts to your phone.

Importing all contacts from your SIM card

1. From the Home screen, tap > People.
2. On the All tab, press MENU. Then tap Import/Export > Import from SIM card.

If you have a Google and/or Exchange ActiveSync account on your phone, choose the account where to put your contacts.

3. Press MENU, and then tap Select all > Save.

Adding a new contact

1. From the Home screen, tap > People.
2. Tap Add contact. Then enter the contact information in the relevant fields.
3. Tap Save.

Synchronizing contacts from your online accounts

You can sync your phone with contacts in your Google Account, Facebook, and even Exchange ActiveSync account. See the complete user guide to see how it's done.

Make your first call

1. On the Home screen, tap Phone.
2. Enter the number or contact you want to call, and then tap Call.
3. To hang up, tap End call.

Send a txt msg

1. From the Home screen, tap > Messages > Compose message.
2. Enter the recipient in the To field.
3. Tap "Add text", and then enter your message.
4. When done, tap Send.

Connect to the Internet

Get online using your phone's data connection or Wi-Fi.

Using a data connection

It's simple. When you turn your phone on for the first time (with the SIM card inserted), it should connect automatically to your mobile operator's data service.

Using Wi-Fi

1. From the Home screen, press MENU.
2. Tap Settings > Wireless & networks.
3. Select the Wi-Fi check box to turn Wi-Fi on.
4. Tap Wi-Fi settings. Then choose a Wi-Fi network to connect to.

If you select an open network, you'll be automatically connected. If you select a secured network, enter the key, and then tap Connect.

Browsing the Web

1. From the Home screen, tap > Internet.
2. On the Browser screen, press MENU. Then tap the address bar on top of the screen.
3. Enter the web address, and then tap the Enter key .
4. Use finger gestures to browse the webpage and to zoom in or out.
